San Luis Obispo, CA 93405

805-728-0300

Technical Skills

Proficient: HTML, CSS, JavaScript, NodeJS, React, Express, Sequelize, Git

Knowledgeable: Angular, C#, .Net, SQL, AWS, PHP, Swift, Objective-C, Redux, Wordpress

Projects

PetGo: .Net - Entity Framework - Angular: Developed by myself and 2 other computer science majors; ASP.NET is used server side along with Angular - Typescript and Bootstrap to build the front end. This is then packaged into a Docker container for deployment to Heroku.

<https://thawing-everglades-61111.herokuapp.com>

Coin Crusade: C# - Mapbox API - Google Cardboard: A VR experience built by myself and a team of 3 other Fullstack Alumn using Unity. Player 1 hosts a server that others join, once in the world players run around Time Square collecting coins.

<https://coincrusade.herokuapp.com>

Stack Chat: NodeJS - SocketIO - React: Application was built as a pair programming exercise alongside a fellow Fullstack Alumn enabling users to create accounts, establish rooms and message in real time.

<https://stack-chatter.herokuapp.com>

Core Bluetooth: Swift - Core Bluetooth: Searches the surrounding area for all Bluetooth devices and visually displays them, Tapping any device will attempt a connection and return all of the possible commands the device is able to send/ receive as a structured object.

Movie List: .NET - MYSQL Server - Angular: Allows users to create and login to accounts. Search feature is powered by iMDB's open movie database and auto populates while typing.

Bitcoin Faucet: Objective-C: The app utilized multiple ad networks to mediate advertisements; that coupled with persistent timestamps, small amounts of a Bitcoin were dished out to users for viewing ads. The app was live for several months with over 4.2K total downloads and over 230,000 sessions.

Love Story Photo Booth: Objective-C – AVFoundation: Developed for a client; the application recorded video using the iPad's front facing camera, collected user information then uploaded videos to YouTube using Google's API.

Education

Fullstack Academy of Code

Oct 2018 – February 2019

- Nationally-ranked software engineering bootcamp with a 9% acceptance rate
- Studied Object-Oriented Design, asynchronous programming and software design
- Extensively practiced pair-programming pairing with all other 28 students individually
- Primary Study: Express, Sequelize, React, APIs and other related technologies

CodeSlo Prep Course

July 2018 – September 2018

- An eight week course in software development in preparation for the Fullstack Academy immersive

Cuesta College

Aug 2011- June 2014

CIS 106 - Server Side Programming:

- HTML, CSS, Javascript , PHP, MYSQL, JQuery, Form Validation

CIS 203 - IOS Development I

- Objective C
