Email: b.stevens.bit@gmail.com

Experienced Full-Stack Developer specialized in designing, implementing, and testing software on modern technology stacks with industry-standard tools and design patterns. Proficient in developing enterprise web services APIs, backend services, and UIs utilizing REST APIs while ensuring high-quality, shippable code through unit and integration tests. Collaborates closely with product management, engineering, QA, and security teams to translate requirements into technical designs, improve development pipelines, and meet security controls.

Work History

Lead React Native Developer - Ecordia Studio - Remote   **July 2023 – September 2023**

- Spearheaded the rapid development of cross-platform mobile applications, playing a pivotal role in increasing core business operations.
- Orchestrated strategic initiatives to establish uniformity in core functionalities, reducing initial time-to-launch by up to 60%.
- **Technologies: React Native, Typescript, Redux, Firebase, Revenue Cat, BLE, Supabase**

Senior Software Developer - VuSpex Virtual Inspections - Remote   **August 2020 – July 2023**

Junior Software Developer - VuSpex Virtual Inspections - Remote   **May 2020 – August 2020**

- Developed a browser-based FaceTime client that remains the most profitable product offering supporting nearly 50,000 monthly active sessions.
- Transitioned the company's native apps to React Native, resulting in an 80% decrease in customer support cases, marked improvement in user satisfaction, and 20,000 monthly active sessions.
- Led brainstorming sessions and focused on understanding and addressing customer needs, resulting in tailored software solutions that boosted user satisfaction by 40%.
- **Technologies: React.js, React Native, Javascript, Typescript, Objective-C/ Swift, Java/ Kotlin, PHP, Linux**

Software Developer - Freelance - Remote   **December 2013 – Present**

- Refactored clients' code enhancing code maintainability and performance by up to 60%.
- Conducted thorough QA analysis on over 30+ client projects identifying critical issues and improving overall software quality and reliability.
- Leveraged technical skills to develop robust software solutions, keeping the clients' business and production needs at the forefront.
- **Technologies: React.js, React Native, Javascript, Typescript, Swift/ Objective-C, Java/ Kotlin, TestFlight**

Lead React Native Developer - Metova - Remote - 6 Month Contract   **January 2022 – June 2022**

Lead React Native Developer - Memo - Remote - 6 Month Contract   **November 2020 – April 2021**

Junior Software Developer - StreamGuys - In Office - Remote   **September 2019 – May 2020**

Education

Fullstack Academy of Code - Certificate   **September 2018 – February 2019**

Cuesta College   **August 2011 – June 2016**

Skills

React.js | React Native | Typescript | JavaScript | HTML | CSS | AJAX | Angular | Node.js | My SQL | Java | Restful APIs | Git | GitHub | Docker | JSON | YAML | XML | Microservices | SOA | Scrum | Postman | ORM | Spring Boot | TCP

Projects

(2023) Betweened: React Native - [iOS](iOS)/ Android

(2023) Right Impact: React Native - [iOS](iOS)/ Android

(2023) Proxus: React Native - BLE - Revenue Cat - [iOS](iOS)/ Android

- Leveraged BLE for real-time proximity alerts & robust group tracking, ensuring safety during outdoor activities.

(2023) Food Genie+: React Native - Redux - [iOS](iOS)/ Android

- Implemented the Chat-GPT API to provide personalized meal recommendations, catering to user preferences and dietary restrictions.

(2023) Storiz: React Native - Redux - In-App-Purchases - [iOS](iOS)

- Brought on for maintenance where I integrated features such as In-App-Purchases and 'Sign In With Apple' as well as optimized the app's performance and user experience.

(2023) Portfolio: React - Bootstrap - React-Router-Dom - bryanstevens.dev

- Designed and developed a user-friendly personal portfolio website to showcase my work and experience.

(2023) TL;DR: React - Redux - Chrome Extension

- Successfully rebuilt the TL;DR Chrome Extension leveraging the Chat-GPT API. As a result, users can now efficiently summarize web content and interactively query it, improving user productivity and engagement.

(2021) VuSpex GO: React Native - OpenTok - GPS - [iOS](iOS)/ Android

- Developed a cross-platform solution that effectively replaced 2 existing mobile apps, reducing customer support load by 60+%.

(2020) ELevel+: React Native - Redux - React Native Bluetooth LE

- Developed an app that seamlessly integrated with AccuAir's Bluetooth module providing real time data visualization and over the air firmware updates.

(2016) Bitcoin Faucet: Objective-C

- Designed an app that incentivized usage by rewarding users with Bitcoin for viewing ads, resulting in over 4.2K total downloads and over 230,000 user sessions.

(2013) The Love Story Project: Objective-C - AVFoundation - Youtube SDK
